To help us determine the perfect CarCaddy specifications for your needs, please answer the following questions:

1. What type of vehicles are you moving?
2. What is max weight of the heaviest vehicle you want to push?
3. How are you moving your vehicles now?
4. If pushing manually, how many people does it take to push your heaviest vehicle?
5. What type of moving surface do you have? (concrete, asphalt, gravel, grass, etc..)
6. Do you have any slope or incline? If yes how steep?
7. Do you have any bumps, lips or obstacle we need to consider? If yes how high?
8. How many moves per day?
9. Please send any pictures you can of the moving surface/inclines.
